

# Community Resource Navigation (CRN) Program

City of Maricopa

## Resource Connection

We provide individuals and families with community resources based on their individualized needs.

## Crisis Follow Up

After an emergency call for mental health, substance use, or social concerns, we provide follow up support once first responders leave.

## Personalized Support

Every situation is unique — we listen, problem-solve together, and provide you with the resources that fit your needs.

## Who We Are?

---

The CRN program is comprised of mental health professionals working in partnership with first responders to provide caring follow-up, resources, and guidance. This allows for a holistic approach to support community members assuring they aren't left navigating challenges alone.

## What We Do?

---

The CRN program helps people access the right resources at the right time. Our goal is to identify opportunities to provide resources and support to community members based on their individualized needs. By addressing underlying needs, we provide personalized guidance so individuals and families can feel supported, safe, and empowered.
